

TECHNICAL SPECIFICATIONS

Product Model	IPCP-MINIINJECTOR
Input Voltage	100-240V AC
Nominal Frequency	50/60Hz
Output Voltage	+48.0Vdc
Output Min. / Max. Load	0A / 0.31A
Output Peak	0.8A
Output Power	15W
Operating Temperature	32°F - 104°F
Dimensions	3.3" x 1.85" x 1.2"

Mini POE Injector Wall Wart Plug | 802.3af full 15 watts | Designed for IP Cameras

- ◆ POE INJECTOR IN COMPACT WALL PLUG DESIGN - Designed like a typical wall wart. Plugs directly into any USA style plug.
- ◆ SMALL FOOTPRINT LOW PROFILE DESIGN - Reduce the amount of wiring and footprint that normally comes associated with other POE Injectors.
- ◆ 15 WATTS OF POWER at 48V 802.3af - This will power any IP camera that accepts POE power. Most IP cameras require 15 watts or less with the exception of some PTZ's. In most circumstances, this will be more than enough power for your cameras.
- ◆ POWER YOUR IP CAMERAS, IP PHONES OR ANYTHING ELSE THAT TAKES 802.3af STANDARD POE POWER - Even though this was designed for IP camera installations, you can still use it for a multitude of any other devices that take standard POE power.
- ◆ ECONOMICAL PRICE POINT WITH PROFESSIONAL PERFORMANCE - IPCamPower products are built to last. This device is no different. Its simple, cost effective, and reliable.
- ◆ Dimensions: 3.3" x 1.85" x 1.2"
